TURFACE introduces: Sports Field Audit for baseball and softball fields

By Mike Hebrard, Athletic Field Design

TURFACE has just introduced a Sports Field Audit for baseball and softball fields. Contact your local TURFACE Distributor that has been trained to conduct the comprehensive Sports Field Audit for your baseball and softball fields.

Athletic Field Designs' Mike Hebrard was chosen as one of the Instructors and worked along with Floyd Perry of Grounds Maintenance Services. Their station included, field layout, edging techniques, wet field preparation and field conditioning. Other topics were mound and homeplate building and the use of TURFACE in turf for topdressing and progressive infield renovation.

After the audit is conducted, a detailed report is prepared specifically for the field and details things from how to prevent bare spots in the outfield to how to keep batters boxes in good condition. TURFACE continues to lead the industry in innovative ways to help coaches and groundskeepers.

Contact TURFACE @ 1 (800) 207-6457 for your nearest distributor or visit them at www.turface.com For those coaches that want the premier playing surface, TURFACE has introduced, TURFACE Pro League tm. It is a smaller uniformed particle size tested and approved by Major League Groundskeepers.

AFD is a TURFACE speaker, clinician, consultant, trainer and Sales representative.
